SUMMARY

Computer Science graduate specializing in Machine Learning, Computer Vision. Experienced in building predictive models using Python, TensorFlow, and PyTorch with proven results in malware detection and price prediction systems.

EDUCATION: BACHELOR'S COMPUTER SCIENCE

Prince Sattam Bin Abdulaziz University

Al-Kharj, Saudi Arabia

CERTIFICATIONS: AI FUNDAMENTALS

SDAIA

Online SDAIA

Fundamentals of artificial intelligence, AI concepts and advanced applications

CERTIFICATIONS: MACHINE LEARNING

Great Learning

Online Great Learning

Master Data Science and Machine Learning in Python, Data visualization using Python, Introduction to TensorFlow and Keras, Python for machine learning, Master Python, Python fundamentals, Gradient Descent

CERTIFICATIONS: DATA SCIENCE

Microsoft

Online Great Learning

Data visualization with Power BI, Master data analytics in Excel

PROJECT: PREDICT USED CAR PRICE

Owner

2026

Developed a machine learning model to predict used car prices using Java Script with no backend integration. Trained on 100k data points with 8 columns.

- Created predictive models achieving an average accuracy of 90% before deployment.
- Built the model in Java Script and later translated it to ONNX format for efficient predictions.
- Selected a lighter model with an accuracy of 81% and deployed it

PROJECT: ANDROID MALWARE DETECTION

Prince Sattam Bin Abdulaziz University

Al-Kharj, Saudi Arabia

Leader, Programmer

2024

- Designed a novel feature extraction technique using static code analysis that improved detection accuracy
- Developed ML based malware detection achieving 99.1% (Dataset 2) and 96.25% (Dataset 1) accuracy.

PROJECT: SILVER PRICE PREDICT

Owner

2026

- Developed and deployed predictive models for stock price prediction in Kaggle
- Accuracy range: 90%–99% during non-work hours, achieving a perfect 99% accuracy on the test set after work days

ACHIEVEMENTS

Prince Sultan University x ACM

Al-Kharj, Saudi Arabia

Leader, Programmer

2022

- Achieved 5th place nationwide in the Saudi Arabia National Java Programming Contest by solving advanced algorithmic and data structure challenges under time constraints.

SKILLS

Soft Skills: Result-Oriented Execution, Strategic Thinking, Determination, Analytical Problem-Solving, Critical Thinking, Intellectual Rigor, Attention to Detail, Systematic Thinking, Clear Communication, Cross-Functional Collaboration, Pragmatic Idealism

Hard Skills: Python, Java, Kotlin, TensorFlow, PyTorch, OpenCV, Recommendation Systems, Computer Vision, Natural Language Processing, Pandas, NumPy, Pipeline, MongoDB, MySQL, Data Structures, Algorithms, Feature Engineering, Data Cleaning, Model Evaluation, Cross Validation, Scikit-learn, Data preprocessing
